DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 3-5, 7-14, 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by LETENDRE et al. (6,214,036).

LETENDRE (Fig. 1-5) discloses male locking body member 14 having flexible locking supports/guide fingers 20, locking members 28, female lock receiving body member 60 having first body end 52 with indented portions/space openings 54, lock operating sheath 50 as recited in the claims.

Art Unit: 3731

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 6, 15 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over LETENDRE et al. (6,214,036).

As to claims 2, 6 and 15, LETENDRE discloses substantially all limitations as recited in the claims and the medical device secured to female lock-receiving support member 60 instead of the medical implant is secured to male locking body member 24. It would have been obvious to one of ordinary skill in the art to secure the LETENDRE medical device to a female lock-receiving support member 60 as claimed because this configuration is only a switch of the securement of the medical device to attach to male locking body member 24 to a securement of the medical device to attach to female lock-receiving support member 60 as recited in the claims without any significant improvement in the performance of the device.

As to claim 20, LETENDRE discloses substantially all limitations as recited in the claim except the medical device is a stent instead of a filter as recited in the claim. Even though the intended use of the device is different, LETENDRE device includes substantially the same structure as the device in the present invention, therefore, claim 20 is unpatentable over LETENDRE device.
